

2. VM ke upr middlewale kaise dalenge Automation ke through?
- 2.1 Terraform Provisioners
- 2.2 UserData/ CustomData / CloudInit

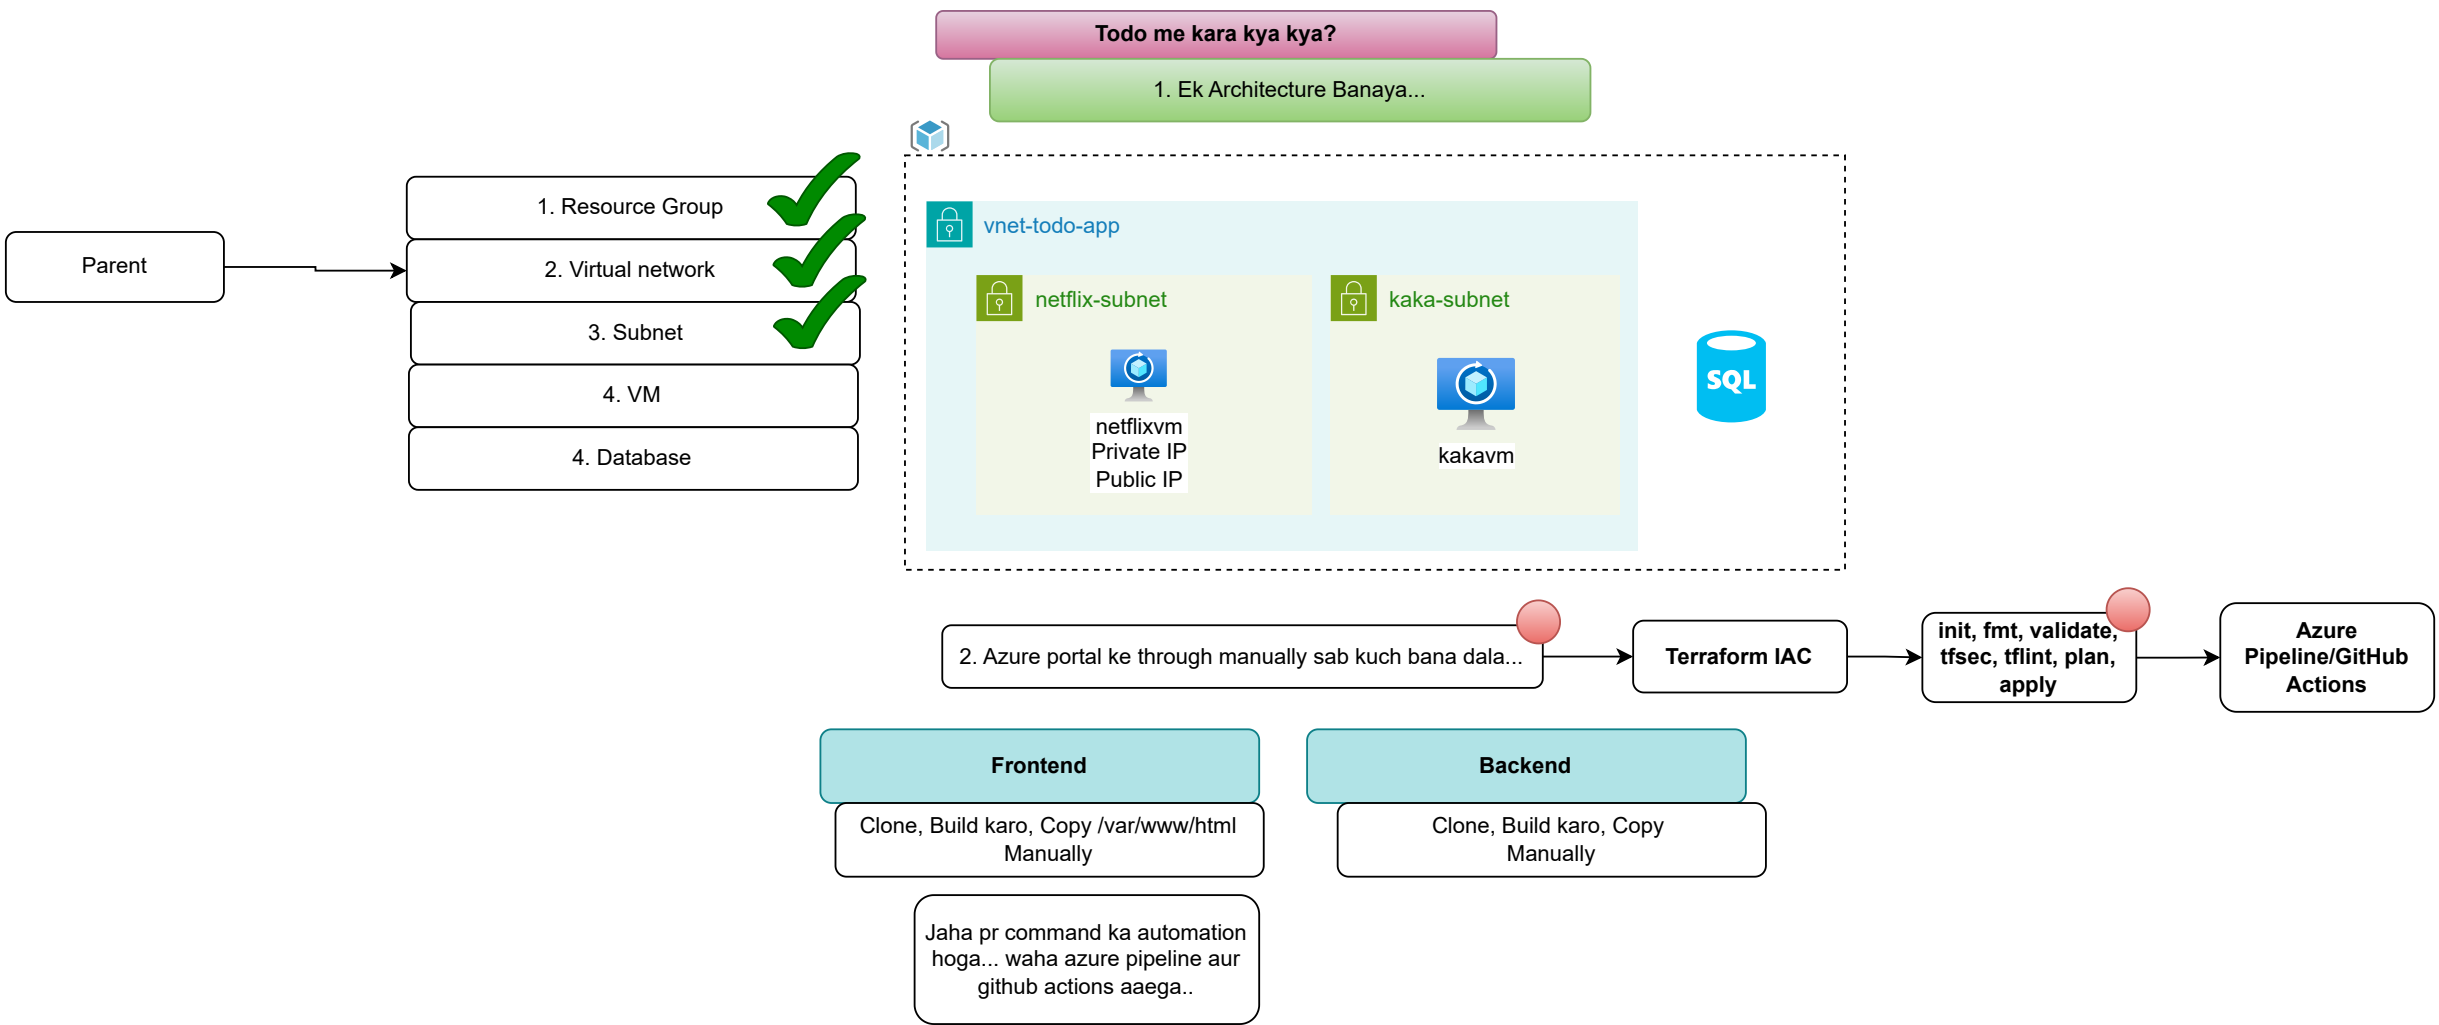

3. Kya init, plan apply manually hi chalate rhenge...

Iske lie pipeline automation... Branching Strategy and Pipeline.

1. Vm Code Automation using custom data script
2. Azure DevOps Pipeline/ GitHub Actions - Infra automation
- 2.1. Infra Automation
- 2.2 Application Deployment Automation

- Step1 - Manual se Terraform Code
- Terraform ek IAC tool hai jisko use karke hum kisi bhi cloud pr resource bana sakte hai..
- Terraform me provider hota hai, jiske andar specific cloud ki sari apis ka detail bhara hota hai...
- Terraform HCL language samjhata hai, .tf file smjhata hai..
- Terraform me block me coding hoti hai... Terraform block, provider block, resource block module block
- Terraform me 2 tarike ke module hote hai.. Parent Module, Child Module
